# The Key To Preventing Auto Theft Is In Your Hand.

There are many ways to secure your vehicle. Remember, the best prevention against auto theft is making your vehicle harder to steal! Thieves will move on to an easier target.

Never hide a second set of keys anywhere in your car.

Never leave your car running while unattended.

Etch the vehicle windows with your VIN number.

Park in a garage, if possible. And, lock all the doors.

Park your vehicle with the wheels turned to the curb.

Never leave valuables in plain sight.

Beware! Older cars are also targeted for their parts.
